**elvor**  
Feed, protect, grow

At birth, calves are deprived of immune defences. They are vulnerable but exposed to health problems in farms. Its important to make them absorb enough colostrum of good quality. (objective : 250 mg of Ig)

### CHARACTERISTICS

- Crude protein : 24,5 %
- Crude fat : 18 %
- Crude ashes : 8,1 %
- Skimmed milk powder : 12 %

**EIMERIVO SECURIVO** is a complete milk replacer specifically formulated to secure milk-fed period in harsh conditions :

- The natural plant extracts **EMX™** helps to maintain gut integrity, whereby to preserve the capacity to absorb nutrients.
- The majority of milk proteins (including casein) ensure high digestibility.

**EIMERICOX™** is a mix of plant extracts and essential oils that helps to manage the risk of coccidiosis and cryptosporidiosis.

The use of **Eimericox™** allows improving growth performances by limiting health impact :

- Control the contamination of young animals
- Prevent a brutal developpement of coccidiosis
- Reduces the risk of intestinal cells' damage.

➔ Better ADG (= decrease the breeding period)

➔ More uniform batches

➔ Better conversion of milk feeding (= good profitability).

• Our milk replacers are highly digestible and dissolve quickly

- They are suitable for administration in 1 or 2 meals and with bucket or via an Automatic Feeding Machine.
- All our products are GMO free, manufactured in France and the raw materials are strictly selected for their nutritional qualities.

## How to use it

### FAST PREPARATION

- 1) Slowly pour the carefully measured quantity of powder onto water heated to 45°C.
- 2) Whisk briskly to obtain a homogeneous mixture.
- 3) The preparation should be at least at 40°C.

Use drinking water and clean tools.  
Close the bag after use.

### ADVICE FOR THE FIRST DAYS:

- \* Provide clean drinking water.
- \* Supply quality straw or hay.
- \* Distribute calf starter from the 2<sup>nd</sup> week and renew daily.

## Feeding chart

### 2 MEALS PER DAY - BUCKET

Week (after colostrum)	WATER (L per meal)	Milk replacer (g per meal)	Total meal (L per meal)
W. 1	2,7	390	3
W. 2	3.6	520	4
W. 3	3.6	520	4
W. 4	3.6	520	4
W. 5	3.6	520	4
W. 6	3.6	520	4
W. 7	2.7	390	3
W. 8	1.8	260	2
W. 9	1.8	260	2

### FEEDING MACHINE (AFM)

	PERIOD (after colostrum)	DURATION	MEAL (L/day)	CONCENTRATION (g/L of water)
BUCKET	1 <sup>st</sup> d→4 <sup>th</sup> d	-	2 x 2L	145
	5 <sup>th</sup> d→7 <sup>th</sup> d	-	2 x 2.5L	145
Feeding Machine	Period 1	7 days	5 to 6 L	145
	Period 2	7 days	6 to 7 L	145
	Period 3	14 days	7 L	145
	Period 4	35 days	7 to 2.5 L	145
	Period 5	3 days	2.5 to 0 L	145

The first weeks of life are a critical period of adaptation. All Elvor milk replacers can be used with 1 meal a day, however, for your animals' welfare and to better monitor and grow them, **Elvor recommends you to distribute 2 meals per day from the first day.** Ask for a 1 meal feeding chart to your technician.
